

Canadian Medical Association response regarding CMA accredited courses for doctors.

Good afternoon Mr. Shea,

Our Online catalogue of accredited CME courses was open to the public some time ago but it is no longer the case. The catalog is a CMA initiative that requires much time and resources to maintain hence this service is now available to CMA members only.

To our knowledge there are at least two courses/programs currently available in Canada regarding medicinal cannabis, they are:

Title: Cannabinoids and their use in Symptom Management

Contact: Dr. Ken Cunningham

Fax : Fax (604) 926-1544

Email: [mr@medicalrounds.com](mailto:mr@medicalrounds.com)

Web: <http://www.medicalrounds.com>

and

Title: Accredited Cannabinoid Education (ACE) III Online Program

Toll-Free: 866.977.4456

Email: [admin@rxmedia.ca](mailto:admin@rxmedia.ca)

Web: <http://vitalcme.com/browse.jsp#pg10009>

I am sorry that the catalogue is no longer accessible and hope that you will find these two references useful for your cause.
